# 8 Introduction and Evaluation Support

aiT, StackAnalyzer, TimingExplorer, TimeWeaver and Astrée are sophisticated program analysis and optimization products. AbsInt strongly recommends to take advantage of a free web-based training at the beginning of your

evaluation. In this training we will help you set up the tools and explain how to operate them so you can quickly evaluate them on your own projects.

As an alternative our support team can visit you at your location, set up the initial operation and fine-tune our products to your operational conditions. For the installation service only travel costs will be billed. Finally we offer 1-2 day introductory and training courses at your place or in Saarbrücken at favorable conditions. These support packages improve the utilization of the products and help to save your valuable time.
